YEAR: 2010 – 2014

Feedback:

It was 4 years of fruitful learning I got here that put me in a position where I am in now. It was not just the learning that we got here, but also the exposure and guidance from the experienced staff.

The staff and the management were very supportive throughout the span of 4 years that helped us build the knowledge. The staffs were ready to guide us in all possible ways which I am really thankful about.

Special thanks to placement related trainings and placement related sessions which molded us to face the recruitment process in an effective manner.

Thanks again to the Staffs, management for building my future.

TATA Consultancy Services

Year : 2012-2016

Feedback:

It's very proud for me to express my gratitude to my department in the way of feedback. The way the professors teach with real time examples made me to get a broad view on technologies. The environment in the college is very pleasant which tends everyone to learn in a comfortable way. The students, I am free to attend seminars, events, project contest in inter college as well as intra college level. The innovation team - Internet of Things (IoT) in my department made me to develop products in high level and they are very supportive to students and always encourage them to make new stuffs. Not only in technical aspect, our department very much interested in social activities also, had which in turn rooted the awareness on society in student's mind. I am so happy that I am working in a place where I can implement what I have learnt in my department.

Thank you so much for everyone in my department who has been ladder for me to reach the heights.

(HOLDINGS) LIMITED

YEAR: 2013-2017

Feedback:

The teachers are very motivate and encourage students in the way what we want to become, It boosts our learning process. Also we got freedom to organize and participate various events which increase our performance and polish our skills that help us to grow as professionals. The staffs were always very helpful and considerate. Classes have been great, dynamic and fun.

Thank you so much. Words can't convey my gratitude

Company joined: Tessolve Semiconductor Bangalore

YEAR: 2012- 2016

Feedback:

Excellent exposure to every kind of facilities like Library and technical things. The Professors and the management were very transparent and supportive in Studies wise and Placement side also.

The Staff were ready to guide us in all possible ways which I am really thankful about and that is helped us to build the good knowledge. Special thanks to placement related trainings and placement related sessions which moulded us to face the recruitment process in an effective manner.

Thanks again to the Professors, management for building my future.

Name : RAMYA S

Designation : Faculty

Institute : Indian Institute of Information Technology (IIIT), Trichy

Batch : 2009 - 2013

Feedback:

It gives me an immense feeling to give the feedback about my department. First of all, I would like to thank all the Faculty Members of **ECE** Department, who guided us throughout our college life. They transferred their knowledge to us in all the possible ways (classroom training, lab sessions, seminars, workshops, placement classes, etc.). They were very supportive during our placement time. They trained us in such a way to face all the competitive exams like GATE, IES, ISRO, etc. They guided us when we wanted to pursue our higher education.

Besides, we had a wonderful infrastructure with smart classrooms, well-equipped labs, department library, water dispensers at the vicinity, etc. Here, I would like to mention about our lab technicians, who helped us a lot in understanding each concepts by doing it practically. Finally, I would like to thank our **HOD**, Dr.V.Kejalakshmi, for creating us a very good environment to study.

Thank you for giving me this opportunity to show my gratitude.

Name: Darshan M S

Compancy joined : Chain-sys India Pvt. Ltd.

Year: 2013-2017

Feedback:

I, Darshan M S, Graduated as an Electronics & Communication Engineer in the year 2017. For the period of 4 years, my department of ECE provided me Golden Days of exploring new stuffs. My department guided me in all the ways that would possibly a High Rated Institution can do. My department conducted several Workshops and Technical Programmes not only in core, but also in various programming languages and to have Hands-On in the latest and emerging technologies. Thanks to those.

In addition to it, the Placement cell provided me a Good Platform to expose my learning's and talents and to get placed in a Top Tier company in Chennai, Chain-sys India Pvt. Ltd. as an Oracle Technical Consultant. I would like to thank my HOD Dr.V.Kejalakshmi for providing various opportunities to Learn, Explore and Innovate things. And, I thank all the Teaching and Non-Teaching Staffs for providing a pleasant and great environment to learn. Thanks for supporting me.

Year	1998-2002

As an alumnus of the Electronics and Communication Engineering (ECE) department, I have fond memories and a deep appreciation for the education and experiences it provided.

ECE is a diverse and dynamic field that encompasses a wide range of technologies and applications, from electronics and communications to computer systems and signal processing.

During my time in the ECE department, I was exposed to state-of-the-art facilities, and a faculty of experts who were passionate about their subjects.

The curriculum was challenging but rewarding, preparing us for the ever-evolving technology landscape and fostering critical thinking and problem-solving skills.

The ECE department provided numerous opportunities for hands-on projects, internships, and industry collaborations, which helped me bridge the gap between theory and real-world applications.

The staff and the management were very supportive throughout the span of 4 years that helped build the knowledge.

The staffs were ready to guide us in all possible ways which I am really thankful about.

Being part of the ECE community also allowed me to interact with like-minded peers, fostering a spirit of innovation and collaboration that has stayed with me throughout my career.

As an alumnus, I feel a strong sense of pride in the advancements made by the department and its alumni.

ECE continues to be at the forefront of technological advancements, shaping the future in areas such as artificial intelligence, robotics, renewable energy, and telecommunications.

I am grateful for the solid foundation the ECE department provided me, enabling me to pursue a successful career in technology.

The memories, knowledge, and friendships gained during my time there will always hold a special place in my heart.

~~I look forward to supporting and contributing to the department's growth and success as alum.~~

Alumni Speaks

Ms. Anbumathi

Founder – Resources Life Science & Design Thinking Expert

As an alumna of KLN College of Engineering – batch 2003-07, I feel privileged to share my thoughts and experiences regarding the Electronic and Communication Engineering Department. During my time at the college, I gained valuable knowledge, practical skills, and unforgettable memories.

The Electronic and Communication Engineering at KLN College of Engineering is boasted with a team of highly knowledgeable and experienced faculty members to deliver the curriculum aligned with current industry standards and kept pace with emerging technologies, which helped me start my own bio-medical Research & Development venture RESOURCES LIFE SCIENCE in 2015. The complete learning engagement is structured with interactive experiential learning through discussions, case studies, and practical demonstrations.

One aspect that truly sets KLN College of Engineering is its focus on industry exposure. The department facilitated regular industrial visits, internships, and expert guest lectures, provided with valuable insights into real-world applications of electronic and communication engineering helped me develop products that solve the problems in the healthcare industry which are recognized with funds from the Department of Science & Technology, Government of India.

Apart from academics, faculties encouraged me to handle placement training for my own juniors which is the seed for my training career, today I am a DESIGN THINKING TRAINER with 14+ years experience in the training industry (as of June 2023). Also, faculties encouraged me to engage in various extracurricular activities like sports, cultural, technical symposiums, workshops, and seminars.

Also happy to be a part of the college alumni network supporting & offering guidance and mentorship to current students.

Mr.Sanjay Kumar AP

Year of graduation :2018

Current Organization :Pantech.ai

Designation :Product Manager

Total experience: 5 years

Points about my department:

I was approved do 1 Month offline Internship on my 3rd Year itself without any restrictions

I am allowed to discuss lot about technical, apart from curriculum – Had a discussions about Chip designs, Embedded driver developments, Electrodes and etc.

If our department likes your idea, our HOD itself will bring you handhold to participate in all available project contests

Enjoyed all my practical laboratory sessions, which were really helpful

I got tons of opportunities to conduct technical classes to my classmates, which increased my confidence and also my technical skills

Thank you to my Department (ECE)and my HOD

Have completed electronics and communication in 2016 batch. Have trained students a lot practically with the help of alumni students which helped a lot for students to learn real time company experience.

Alumni Speaks

I would like to express my sincere thanks to both the teaching and non-teaching staffs of my department who carving me as I'm today. Our department always have a believe in their students and encourage them to explore and apply their knowledge on many real time activities and also supports the students who have skills in the sports division. Starting from HOD madam to every staffs are always looking to create the great opportunity to the students to develop their practical knowledge in parallel with the theoretical classes. In that way they arranged multiple inter and intra-level mini-project competitions for our and other college students. Also, arranged internships with the bigger institute like Honeywell. I was one among them who grabbed the opportunity to explore the industrial environment and culture during my college final year.

Alumni Speaks

Mr.Arvind Kumar T R

Member Technical Staff at Zoho

Our department provided us with ample opportunities to both explore and express ourselves. My professors were very reachable and will always go one step ahead when we reach them out with queries.

Alumni Speaks

Mr. Yaswath

Current designation: senior engineer

Current organisation: Mercedes benz Research and development India

Department: Powertrain (We do development and validation for hybrid and electric vehicles)

In KLNCE, ECE is one of the active department with supportive staff. Brings a good number and workshop and conducts a project contest within the department to keep the students engaged with the latest technology.
