

K.L.N. COLLEGE OF ENGINEERING

Pottapalayam, Sivagangai District.

(An Autonomous Institution, Affiliated to Anna University, Chennai)

Estd: 1994

CURRICULUM & SYLLABUS

CHOICE BASED CREDIT SYSTEM

REGULATIONS 2020

For Post Graduate Program

MASTER OF COMPUTER APPLICATIONS

(For the students admitted from the academic year 2020-2021 onwards)

K.L.N. COLLEGE OF ENGINEERING,POTTAPALAYAM
(An Autonomous Institution, Affiliated to Anna University, Chennai)

VISION OF THE INSTITUTION

To become a Premier Institute of National Repute by Providing Quality Education, Successful Graduation, Potential Employability and Advanced Research & Development through Academic Excellence.

MISSION OF THE INSTITUTION

To Develop and Make Students Competent Professional in the Dynamic Environment in the field of Engineering, Technology and Management by emphasizing Research, Social Concern and Ethical Values through Quality Education System.

VISION OF THE DEPARTMENT

To create innovative pedagogy with the source of knowledge in the successive development of Computer Technology in current trends.

MISSION OF THE DEPARTMENT

To produce technically skillful, competent, employable, software professionals and researchers with social responsibilities and ethical values.

K.L.N. COLLEGE OF ENGINEERING,POTTAPALAYAM
(An Autonomous Institution, Affiliated to Anna University, Chennai)

PROGRAM SPECIFIC OUTCOMES (PSOs)

PSO 1: Enables a student to implement a high performing system by selecting appropriate data model, Architecture and Platform

PSO 2: Enable the students to design and develop application software for real time systems by integrating various system based components

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO 1: To prepare the students for the future challenges in the field of computer applications by providing strong technical foundations

PEO 2: To provide students various computing skills like analysis, design, coding for the development of innovative software products to excel in their profession.

PEO 3: To motivate the students to exhibit continuous improvement in their professional career through lifelong learning with societal ethics

PEO 4: To motivate the students to function effectively in multi disciplinary teams, in various domains for the benefit of society

PROGRAM OUTCOMES (POs)

PO1: Computational Knowledge: Apply knowledge of computing fundamentals, computing specialisation, mathematics, and domain knowledge appropriate for the computing specialisation to the abstraction and conceptualisation of computing models from defined problems and requirements.

PO2: Problem Analysis: Identify, formulate, research literature, and solve complex computing problems reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines.

PO3: Design /Development of Solutions: Design and evaluate solutions for complex computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex Computing problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5: Modern Tool Usage: Create, select, adapt and apply appropriate techniques, resources, and modern computing tools to complex computing activities, with an understanding of the limitations.

PO6: Professional Ethics: Understand and commit to professional ethics and cyber regulations, responsibilities, and norms of professional computing practices.

PO7: Life-long Learning: Recognise the need, and have the ability, to engage in independent learning for continual development as a computing professional.

PO8: Project management and finance: Demonstrate knowledge and understanding of the computing and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO9: Communication Efficacy: Communicate effectively with the computing community, and with society at large, about complex computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations, and give and understand clear instructions.

PO10: Societal and Environmental Concern: Understand and assess societal, environmental, health, safety, legal, and cultural issues within local and global contexts, and the consequential responsibilities relevant to professional computing practices.

PO11: Individual and Team Work: Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary environments.

PO12: Innovation and Entrepreneurship: Identify a timely opportunity and using innovation to pursue that opportunity to create value and wealth for the betterment of the individual and society at large.

K.L.N. COLLEGE OF ENGINEERING, POTTAPALAYAM

(An Autonomous Institution, Affiliated to Anna University, Chennai)

REGULATIONS 2020

CHOICE BASED CREDIT SYSTEM

MASTER OF COMPUTER APPLICATIONS

CATEGORY OF COURSES

- i. **FOUNDATION COURSES (FC)** may include Mathematics or other basic courses
- ii. **PROFESSIONAL CORE (PC)** courses include the core courses relevant to the chosen specialization/branch.
- iii. **PROFESSIONAL ELECTIVES (PE)** courses include the elective courses relevant to the chosen specialization/ branch.
- iv. **EMPLOYABILITY ENHANCEMENT COURSES (EEC)** includes Project Work and/or Internship, Seminar, Professional Practices, Summer Project, Case Study and Industrial / Practical Training.
- v. **AUDIT COURSES (AC)** include courses which develop desired attitude.

K.L.N. COLLEGE OF ENGINEERING, POTTAPALAYAM

20MC101	MATHEMATICAL FOUNDATIONS FOR COMPUTER APPLICATIONS	L	T	P	C	
		3	1	0	4	
OBJECTIVES:						
<ul style="list-style-type: none"> The primary objective of this course is to provide mathematical background and sufficient experience on various topics of discrete mathematics like matrix algebra, logic and proofs, formal languages and finite state automata. This course will extend student's Logical and Mathematical maturity and ability to deal with abstraction and to introduce most of the basic terminologies used in computer science courses and application of ideas to solve practical problems. 						
UNIT I	MATRIX ALGEBRA					12
Matrices, Rank of Matrix, Solving System of Equations-Eigen values and Eigenvectors-Inverse of a Matrix - Cayley Hamilton Theorem.						
UNIT II	BASIC SET THEORY					12
Basic Definitions - Venn Diagrams and set operations - Laws of set theory - Principle of inclusion and exclusion- Relations- Properties of relations - Matrices of relations - Functions - injective, surjective and bijective functions.						
UNIT III	MATHEMATICAL LOGIC					12
Propositions and logical operators - Truth table - Propositions generated by a set - Equivalence and implication - Basic laws - Some more connectives - Functionally complete set of connectives – Normal forms - Proofs in propositional calculus - Predicate calculus.						
UNIT IV	FORMAL LANGUAGES					12
Languages and Grammars-Phrase Structure Grammar-Classification of Grammars-Pumping Lemma For Regular Languages-Context Free Languages.						
UNIT V	FINITE STATE AUTOMATA					12
Finite State Automata-Deterministic Finite State Automata(DFA), Non Deterministic Finite State Automata (NFA)-Equivalence of DFA and NFA- Equivalence of NFA and Regular Languages.						
TOTAL: 60 PERIODS						
OUTCOMES:						
Upon Completion of the Course, the Students will be able to:						
<ul style="list-style-type: none"> ❖ Understand the basic knowledge of matrix, Rank of a Matrix, Find inverse of a Matrix. ❖ Apply the set theory, functions and relations concepts needed for designing and solving problems. ❖ Acquire the knowledge of logical operations needed for computing skill. ❖ Find PCNF & PDNF and conversion. Apply predicate calculus. ❖ Analyse the acquired knowledge of formal languages to the engineering areas like Compiler Design. ❖ Apply finite automata theory and design discrete problems to solve by computers.

20MC102	DATABASE MANAGEMENT SYSTEMS	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> To understand the fundamentals of data models and conceptualize and depict a database system using ER diagram To know about relational data model and SQL queries To understand the transaction management and recovery concepts To study about file management and indexing structures To understand other special purpose databases 					
UNIT I	INTRODUCTION				9
File Systems versus Database Systems – Data Models – DBMS Architecture – Entity Relationship Model – Enhanced ER Modeling Concepts					
UNIT II	RELATIONAL MODEL				9
Relational Model Concepts – Relational Algebra – Structured Query Language – Queries – Relational Calculus – Functional Dependencies – 1NF – 2NF – 3NF – 4NF – 5NF					
UNIT III	TRANSACTION PROCESSING				9
Transaction Processing – Properties of Transaction – Serializability – Transaction support in SQL – Locking Techniques – Time Stamp Ordering – Validation Techniques – Granularity of data items – Recovery Concepts – Shadow Paging – Log Based Recovery					
UNIT IV	FILES AND INDEXING				9
File Operations – Hashing Techniques – Indexing – Single Level and Multi Level Indexes – B+ Tree – B Tree – Static Hashing – Indexes on Multiple Keys					
UNIT V	SPECIAL PURPOSE DATABASES				9
OODBMS- - Object-Based Databases - OO Data Model - OO Languages – Persistence – Object Relational Databases - XML – Structure of XML –Database Tuning -Case Study for Design and Manage the Database for any Project.					
TOTAL: 45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Distinguish different data models and analyze how data is represented in each model ❖ Design database using ER diagram and mapping ER diagram into relations ❖ Construct simple database applications using normalization ❖ Analyze the requirements of transaction processing and implementing concurrency control among transactions ❖ Create indexing structures for quick retrieval of data ❖ Demonstrate the use of modern tools for special purpose databases

4. Peter Rob, Carlos Coronel, “Database System Concepts”, Cengage Learning, 2008.					

20MC103	COMPUTER ORGANIZATION	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> To understand the various number systems To become familiar with Boolean algebra To study the different types of combinational and sequential circuits To comprehend the basis operations that happen in a CPU To learn the data path and control path implementation To become familiar with the memory hierarchy design and I/O design 					
UNIT I	DIGITAL FUNDAMENTALS				8
Number Systems and Conversions – SOP, POS- Boolean Algebra and Simplifications - Minimization of Boolean Functions – Karnaugh Map, QuineMcClusky Method. Logic Gates – NAND NOR implementation.					
UNIT II	COMBINATIONAL AND SEQUENTIAL CIRCUITS				10
Design of Circuits –Adder / Subtractor – Encoder – Decoder – MUX /DEMUX – Comparators, Flip flops – Triggering – Master – Slave Flip Flop – State Diagram and Minimization – Registers					
UNIT III	BASIC STRUCTURE OF COMPUTER				9
Functional Units - Basic Operational Concepts – Bus structures – Performance and Metrics – instruction and instruction sequencing – Hardware Software Interface – Addressing modes – Instruction Sets – RISC and CISC – ALU Design – Fixed point and Floating point operations					
UNIT IV	PROCESSOR DESIGN				9
Processor basics –CPU Organization – Data Path Design – Control Design – Basic concepts – Hardwired control – Micro Programmed control – Pipe control – Hazards super scale operations					
UNIT V	MEMORY AND I/O SYSTEMS				9
Types of Memory- Primary, Secondary- Virtual Memory – Caches – Associative memories – Input /output system – Programmed I/O – DMA and interrupts – I/O devices					
TOTAL : 45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Solve using laws of Boolean algebra and Karnaugh map method ❖ Construct various combinational and sequential circuits ❖ Examine the various addressing modes ❖ Illustrate the flow of Pipelines and their Hazards ❖ Compare the various mapping policies used in cache memories ❖ Analyze the various types of I/O transfers

20MC104	OPERATING SYSTEMS	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> To provide basic knowledge about operating systems, their services, process concept and process synchronization To explore CPU scheduling concepts and Deadlocks To know about Memory Management concepts To know about disk structure and disk scheduling algorithms To provide knowledge about files and directories 					
UNIT – I	INTRODUCTION				9
Introduction – Computer systems structures: computer system operation – I/O structure – storage structure – storage hierarchy – Hardware protection – operating system structures: system components – operating system services – system calls – Processes: process concept – process scheduling – operations on processes – cooperating processes – Inter process communication – process synchronization: The critical-Section problem – Synchronization hardware – Semaphores – classic problems of synchronization					
UNIT - II	CPU SCHEDULING AND DEADLOCK				9
CPU Scheduling: Basic concepts – scheduling criteria – scheduling algorithms – Deadlocks: system model – Deadlock characterization – methods for handling deadlocks – deadlock prevention-deadlock avoidance – deadlock detection – Recovery from deadlock					
UNIT - III	MEMORY MANAGEMENT				9
Memory management: Swapping – contiguous memory allocation – Paging – Segmentation – Segmentation with paging – Virtual memory: Demand paging – Process creation – Page replacement – Allocation of frames – thrashing					
UNIT - IV	MASS STORAGE STRUCTURE				9
Mass storage structure – Disk structure – Disk scheduling – Disk management – Swap space management – RAID structure					
UNIT - V	FILE SYSTEM				9
File system interface: File concept – Access methods – Directory structure- File system mounting – file systems in Linux and windows – Mobile operating system					
Total : 45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Apply the concept of OS services, process concepts and process synchronization. ❖ Examine classical problems of synchronization. ❖ Analyse CPU scheduling algorithms and Deadlock concepts. ❖ Apply memory management concepts and techniques for an appropriate OS. ❖ Analyse disk structure and their disk scheduling algorithms. ❖ Apply the concepts of file and directories for the relevant OS.

20MC105	PROGRAMMING IN JAVA	L	T	P	C
		3	1	0	4
OBJECTIVES:					
<ul style="list-style-type: none"> To understand the Object oriented concepts and its implementation in Java programming. To provide skills on implementation of Data Structures To understand and apply the fundamentals core java, packages, database connectivity for computing To enhance the knowledge in the Window Based Application Development 					
UNIT - I	OBJECT ORIENTED PROGRAMMING AND JAVA	12			
Introduction to Programming Languages-Procedure Oriented Language (POP)-Features of Object Oriented Programming Language (OOPs)-POP vs OOPs-Characteristics of OOP-Classes, Objects, Data Abstraction & Encapsulation-Introduction to Java-Features of Java-Data Types, Expressions, Object Creations in Java- Control Structures – Functions-Arrays, Multi-Dimensional Array- Static Data Types & Functions					
UNIT - II	POLYMORPHISM & INHERITANCE	12			
Polymorphism-Method Overloading-Constructors-Constructor Overloading-Inheritance-Method Overriding-Dynamic Binding-Case Study on Dynamic Binding-Final Modifier, Abstract Method-Abstract Class-Interface-Multiple Inheritance-Packages-Access Specifiers.					
UNIT - III	EXCEPTIONS & MULTI-THREADING	12			
Introduction to Exceptions-Need for Handling Exceptions-Java Built-in Exceptions & Exception Classes-Exception Handling Mechanism-try, catch, finally, throw, throws-Customized Exception-Inner Classes-Types of Inner Classes-Thread-Multiple Threading and Multi-Processing-Thread Priorities-Synchronized Thread					
UNIT - IV	STREAMS & COLLECTIONS	12			
Streams-IO Streams-Byte Array Streams-Buffered Streams-Character Streams-Creating Files-Random Access Files-Introduction to Utility Packages- Introduction to collection –Hierarchy of Collection framework – Generics, stack, Vector, Array list, Linked List, HashSet, HashMap – Java annotations.					
UNIT - V	ADVANCED JAVA PROGRAMMING	12			
Applet Fundamentals-UI Components-Layout Managers-Working with Windows, Graphics, Text-Frame Window-Events-Event Handling Mechanisms-Mouse and Window Events-Creating Menu Items-Introduction to JDBC-Connecting Database with JDBC-URL-Java Network Programming-TCP Sockets-UDP Sockets-Servlets - RMI					
TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Interpret Java programs using Object Oriented Programming principles ❖ Create simple applications using class hierarchy, Interfaces, packages ❖ Apply parallel processing using threads and analyse runtime exceptions arise in applications ❖ Apply I/O, Util packages, database connectivity for computing ❖ Design Window based applications ❖ Analyze and apply suitable Sockets for client and Server Programming

20RM101	RESEARCH METHODOLOGY AND IPR	L	T	P	C
		2	0	0	2
OBJECTIVES:					
To give an overview of the research methodology and explain the technique of defining a research problem and to explain the functions of the literature review in research. This course can explain the art of interpretation and the art of writing research reports. Also it explains various forms of the intellectual property, its relevance and business impact in the changing global business environment.					
UNIT I	INTRODUCTION TO RESEARCH METHODOLOGY	6			
Meaning of research problem, Sources of research problem, Criteria Characteristics of a good research problem, Errors in selecting a research problem, Scope and objectives of research problem. Approaches of investigation of solutions for research problem, data collection, analysis, interpretation, Necessary instrumentations. Effective literature studies, approaches, analysis, Plagiarism, Research ethics.					
UNIT II	EFFECTIVE TECHNICAL WRITING	6			
How to write report, Paper Developing a Research Proposal, Format of research proposal, a presentation and assessment by a review committee.					
UNIT III	INTELLECTUAL PROPERTY AND INTERNATIONAL SCENARIO	6			
Nature of Intellectual Property: Patents, Designs, Trade and Copyright. Process of Patenting and Development: technological research, innovation, patenting, development. International Scenario: International cooperation on Intellectual Property. Procedure for grants of patents, Patenting under PCT.					
UNIT IV	PATENT RIGHTS	6			
Scope of Patent Rights, Licensing and transfer of technology, Patent information and databases, Geographical Indications.					
UNIT V	NEW DEVELOPMENTS IN IPR	6			
Administration of Patent System, New developments in IPR, IPR of Biological Systems, Computer Software etc. Traditional knowledge Case Studies, IPR and IITs.					
TOTAL: 30 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Understand research problem formulation. ❖ Analyze research related information. ❖ Follow research ethics. ❖ Understand that today's world is controlled by Computer, Information Technology, but tomorrow world will be ruled by ideas, concept, and creativity. ❖ Understanding that when IPR would take such important place in growth of individuals & nation, it is needless to emphasis the need of information about Intellectual Property Right to be promoted among students in general & engineering in particular. ❖ Understand that IPR protection provides an incentive to inventors for further research work and investment in R & D, which leads to creation of new and better products, and in turn brings about, economic growth and social benefits.

20MC1L1	JAVA PROGRAMMING LABORATORY	L	T	P	C
		0	0	4	2
OBJECTIVES:					
<ul style="list-style-type: none"> • Try and develop the most important technologies that are being used today by web developers to build a wide variety of web applications. • To develop java based web programming. • To understand and apply the fundamentals core java, packages, database connectivity for computing. • To enhance the knowledge to server side programming. • To provide knowledge on advanced features like Applet, sockets etc. 					
LIST OF EXPERIMENTS:					
<ol style="list-style-type: none"> 1. Develop Java program using class, inheritance, package etc for the following <ul style="list-style-type: none"> • Different type of inheritance study. • Use of 'this' keyword. • Polymorphism. • Creation of user specific packages. • User specific exception handling. • Creation and usage of jar files. 2. Writing window based GUI applications using frames and applets such as calculator application, Fahrenheit to Centigrade conversion etc. 3. Event Handling. 4. Reading and writing text files. 5. Writing an RMI application to access a remote method. 6. Writing a servlet program with database connectivity for a web based application such as students result status checking, PNR number enquiry etc. 7. Create an application to search phone number using contact number using Hash Map. 8. Implementation of socket program using TCP. 9. Implementation of socket program using UDP. 10. Application of threads example. 					
TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Apply the Object Oriented features of java for programming on the internet. ❖ Analyse java programs using GUI and Event handlings. ❖ Analyse java programs using Servlets and RMI concepts. ❖ Design mapping functions for any given application in java. ❖ Analyse socket programming and client side scripting in java. ❖ Analyse threads program in java with moral ethics and communication. 					

20MC1L2	DBMS LABORATORY	L	T	P	C
		0	0	4	2
OBJECTIVES:					
<ul style="list-style-type: none"> • To Create Tables and Views • To Insert and Manipulate Records • To Perform operations in a procedural manner using PL/SQL • To Implement Procedures and Functions • To Apply Triggering operations 					
LIST OF EXPERIMENTS:					
<ol style="list-style-type: none"> 1. Basic SQL Commands 2. Tables and Views – Creation (DDL) 3. Data Manipulation: (DML) <ol style="list-style-type: none"> a. INSERT, DELETE and UPDATE in tables, SELECT, Sub Queries and JOIN. 4. TCL and Data Control Commands. 5. High Level Language extensions – PL/SQL 6. Perform Cursors in PL/SQL 7. Use of Procedures and Functions. 8. Packages in PL/SQL 9. Performance of Oracle Triggers. 10. Connectivity with Front end and Back end 					
TOTAL : 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Analyze the different database objects ❖ Demonstrate the Knowledge of Inserting and manipulating the data ❖ Evaluate programs in PL/SQL environment ❖ Compute Procedures and Functions in PL/SQL ❖ Apply Oracle Triggers using Front end ❖ Create a connection between Front end and Back end 					

20MC1L3	COMMUNICATION SKILLS LABORATORY	L	T	P	C
		1	0	2	2
OBJECTIVES:					
<ul style="list-style-type: none"> • To provide opportunities to learners to practice their communicative skills to make them become proficient users of English. • To enable learners to fine-tune their linguistic skills (LSRW) with the help of technology to communicate globally. • To enhance the performance of learners at placement interviews and group discussions and other recruitment procedures. 					
LIST OF EXPERIMENTS:					
<p>1. PC based session (Weightage 40%)</p> <p>A. English Language Lab (15)</p> <p>1. Listening Comprehension: (5) Listening and typing – Listening and sequencing of sentences – Filling in the blanks - Listening and answering questions.</p> <p>2. Reading Comprehension: (5) Filling in the blanks - Close exercises – Vocabulary building - Reading and answering questions.</p> <p>3. Speaking: (5) Phonetics: Intonation – Ear training - Correct Pronunciation – Sound recognition exercises – Common Errors in English. Conversations: Face to Face Conversation – Telephone conversation– Role play activities</p> <p>2. B. Discussion of audio-visual materials (Samples to learn and practice) (6)</p> <p>1. Resume / Report Preparation / Letter Writing (1) Structuring the resume / report - Letter writing / Email Communication - Samples.</p> <p>2. Presentation skills: (1) Elements of effective presentation – Structure of presentation - Presentation tools – Voice Modulation – Audience analysis - Body language – Video samples</p> <p>3. Soft Skills: (2) Time management – Articulateness – Assertiveness – Psychometrics – Innovation and Creativity - Stress Management & Poise - Video Samples</p> <p>4. Group Discussion: (1) Why is GD part of selection process? - Structure of GD – Moderator – led and other GDs Strategies in GD – Team work - Body Language - Mock GD –Video samples</p> <p>5. Interview Skills: (1) Kinds of interviews – Required Key Skills – Corporate culture – Mock interviews- Video samples.</p> <p>3. II. Practice Session (Weightage – 60%)</p> <p>Resume / Report Preparation / Letter writing: (2)</p> <p>4.SOFT SKILLS (6) Hard skills & soft skills – soft skills: self-management skills & people skills - training in soft skills persuasive skills – sociability skills –interpersonal skills – team building skills – leadership skills – problem solving skills – adaptability - stress management – motivation techniques – life skills</p> <p>5. PRESENTATION SKILLS (6) Preparing slides with animation related to the topic – organizing the material - Introducing oneself to the audience – introducing the topic – answering questions – individual presentation practice— presenting the visuals effectively – 5 minute presentation</p>					

6. GROUP DISCUSSION SKILLS (5)

Participating in group discussions – understanding group dynamics - brainstorming the topic -- questioning and clarifying –GD strategies (expressing opinions, accepting or refusing others opinions, turn taking) – activities to improve GD skills – viewing recorded GD - mock GD.

7. INTERVIEW SKILLS (5)

Interview etiquette – dress code – body language – mock interview --attending job interviews – answering questions confidently – technical interview – telephone/Skype interview - practice in different types of questions – one to one interview & panel interview – FAQs related to job interview- Emotional and cultural intelligence

TOTAL : 45 PERIODS

OUTCOMES:**Upon Completion of the Course, the Students will be able to:**

- ❖ Students will be able to make presentations and participate in group discussions with high level of self-confidence.
- ❖ Students will be able to perform well in the interviews
- ❖ They will have adequate reading and writing skills needed for workplace situations

20MC201	COMPUTER NETWORKS	L	T	P	C	
		3	0	0	3	
OBJECTIVES:						
<ul style="list-style-type: none"> To understand networking concepts and basic communication model To understand network technologies to connect to different hosts To analyze the function and design strategy of various layers To acquire basic knowledge of various application protocol for internet security issues and services To analyze performance of networking and simulate them using networking tools To understand network technologies to connect to different hosts 						
UNIT - I	NETWORK FUNDAMENTALS					9
Categories of Networks – Communication Model – Protocol architecture- ISO/OSI architecture – functionalities of OSI layers – TCP/IP architecture – Types of Networks (LAN, WAN,MAN, VPN,VLAN) – Transmission Media – LAN Topologies.						
UNIT - II	N/W TECHNOLOGIES TO CONNECT HOSTS					9
LAN Technologies (Ethernet, Token ring) – WAN Technologies(Circuit Switching – ISDN, Packet Switching – Frame Relay – IEEE 802.11) – Multiple Access- CSMA/CD – Flow Control Techniques – Error Control Techniques.						
UNIT - III	INTERNETWORKING					9
IPV4 – Global addresses – ICMP – Routing – Intra Domain Routing Algorithm (RIP, OSPF) – Subnetting – Classless Addressing – Inter Domain Routing – IPV6 – Multicasting.						
UNIT - IV	PROTOCOL STACK					9
End –to End protocols [TCP(Segment format, Connection establishment and Termination, Congestion Control, Flow Control), UDP] –						
UNIT - V	APPLICATION AND SECURITY					9
Application layer protocols (DNS, SMTP, WWW, SNMP) – Security- threats and services- Cryptography- Algorithms (RSA, DES).						
TOTAL : 45 PERIODS						
OUTCOMES:						
Upon Completion of the Course, the Students will be able to:						
<ul style="list-style-type: none"> Analyse about functionalities and protocols of various layers of networks using different topologies. Analyse Local Area network with various connecting components using transmission media. Apply appropriate technologies to connect the hosts to network. Examine suitable internetworking routing algorithms for a given network. Apply suitable end-to-end protocols using congestion control mechanism. Analyse various application protocols and assess its security issues in network.

20MC202	SOFTWARE ENGINEERING	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> • To provide an insight into software life cycle and various software process models • To estimate the resources for developing the application and to prepare the schedule • An ability to function effectively on teams to accomplish a common goal. • An ability to use current techniques, skills, and tools necessary for computing practice. • To construct software with high quality and reliability. 					
UNIT – I	INTRODUCTION				9
Role of Software – Software Characteristics – The Software Process – Overview of CMMI – Prescriptive Process Models: The Waterfall Model, Incremental Models (Incremental and RAD) - Evolutionary Process Models (Prototyping, Spiral and Concurrent Development) – Agile Process Models.					
UNIT – II	REQUIREMENT ENGINEERING AND ANALYSIS MODELING				9
Requirements Engineering Tasks - Initiating the Requirements Engineering Process - Eliciting requirements - Negotiating requirements – Validating requirements – Requirements Analysis - Analysis modeling – Data modeling – Flow oriented modeling. Case Study: Project Planning, SRS					
UNIT – III	SOFTWARE DESIGN				9
Designing Concepts - Abstraction – Modularity – Software Architecture – Cohesion – Coupling – Dataflow Oriented Design - Jackson System Development - Real time and Distributed System Design – Designing for Reuse — Case Study: Design for any Application Oriented Project.					
UNIT – IV	SOFTWARE TESTING AND MAINTENANCE				9
Software Testing Fundamentals – Software Testing Strategies – Black Box Testing – White Box Testing – System Testing – Object Orientation Testing – State Based Testing - Testing Tools – Test Case Management – Types of Maintenance – Case Study: Testing Techniques					
UNIT – V	SCM & WEB ENGINEERING				9
Need for SCM – Version Control – SCM process – Software Configuration Items –Taxonomy – Re Engineering – Reverse Engineering - Web Engineering - CASE Repository – Features.					
TOTAL: 45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Understand the problem domain to choose process models and to develop SRS ❖ Analyze the software projects models using appropriate design notations ❖ Measure the product and process performance using various metrics ❖ Analyze the importance of software testing ❖ Evaluate the system with various testing techniques, strategies and to identify how the SCM tools are used in software development. ❖ Analyze, design, verify, validate, implement, and maintain software systems.

20MC203	PYTHON PROGRAMMING	L	T	P	C
		3	1	0	4
OBJECTIVES:					
<ul style="list-style-type: none"> To understand new Programming features in Python To provide skills on implementation of Data Structures in Python To enhance knowledge on Object Oriented Techniques in Python To improve skills on various Special Functions in Python To provide knowledge on Web Page Development 					
UNIT - I	PYTHON STATEMENTS AND FUNCTIONS	12			
Introduction- Python interpreter and interactive mode; values and types: int, float, boolean, string, and list; variables, expressions- Conditionals: Boolean values and operators, conditional (if), alternative (if-else), chained conditional (if-elif-else); Iteration: state, while, for, break, continue, pass-Functions; default, keyword arguments parameters, local and global scope, function composition, recursion, Lambda; Strings: string slices, immutability, string functions and methods, string module					
UNIT - II	DATA STRUCTURES IN PYTHON	12			
Lists: list operations, list slices, list methods, list loop, mutability, aliasing, cloning lists, list parameters; Sets-Tuples: tuple assignment, tuple as return value-Sets vs Tuples- Dictionaries: operations and methods; advanced list processing - list comprehension-Arrays-Numpy-Creating arrays in Numpy-Matrix-Copying arrays-For loop with List-Filter, Reduce, Map Operations					
UNIT - III	INHERITANCE AND SPECIAL FUNCTIONS	12			
Introduction to Classes-Object creations in python-Constructors-Dunder Functions-Decorators-Property Decorators-Inner Classes-Operator Overloading-Duck Typing-Inheritance-Multiple Inheritances-Method Overriding-Method Resolving Order (MRO)-Runtime Polymorphism					
UNIT - IV	MODULES AND FILE HANDLING	12			
Modules-PIP-Importing Modules-User-Defined Modules-main() function-Packages- Generators-Exceptions-try, catch, finally-Raise Exception-Threading-Multiple Threading-Context Manager-Files: text & Binary files, reading and writing files, format operator; command line arguments					
UNIT - V	DATABASE CONNECTIVITY	12			
Database Connectivity-SQLite, MySQL-Execute Queries-Virtual Environment-Creating Virtual Environment- Tkinter-UI Components-Events-Events Handling Mechanisms.					
TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Understand and Implement OOP techniques in Python ❖ Apply various Data Structures in a simplified way ❖ Use Python with Databases ❖ Apply Modules Files in Python Programs ❖ Design Window based applications ❖ Design and Solve Problems and explore real world challenges. 					
REFERENCES:

20MC204	DATA STRUCTURES AND ALGORITHMS	L	T	P	C
		3	1	0	4
OBJECTIVES:					
<ul style="list-style-type: none"> To learn linear data structures-Stack, Queue and Linked List To learn non linear data structures –Tree and Graphs To be exposed to sorting ,searching and hashing techniques To be familiar with the various algorithm design techniques To apply the algorithm design techniques to real world problems and analyze them. 					
UNIT I	LINEAR DATA STRUCTURES				12
Introduction - Abstract Data Types (ADT) – Stack ADT – Operations on Stack - Applications of stack – Infix to postfix conversion – evaluation of expression - Queue ADT – Operations on Queue - Circular Queue - Applications of Queue. List ADT - Array-based Implementation - Singly Linked Lists – Doubly Linked Lists - Applications of linked list – Polynomial Addition					
UNIT II	NON LINEAR DATA STRUCTURES				12
Trees and its representation -Binary Tree – expression trees – Binary tree traversals – applications of trees – Binary search tree - Balanced Trees - AVL Tree – B-Tree - Heap- Heap operations- Graph and its representation - Graph Traversals - Depth-first traversal – breadth-first traversal - applications of graphs-shortest-path algorithms – minimum spanning tree – Prim's and Kruskal's algorithms					
UNIT III	SORTING, SEARCHING AND HASH TECHNIQUES				12
Sorting algorithms: Insertion sort - Bubble sort - Quick sort - Searching: Linear search –Binary Search - Hashing: Hash Functions – Separate Chaining – Open Addressing – Rehashing.					
UNIT IV	ALGORITHM DESIGN AND ANALYSIS				12
Algorithm Analysis – Asymptotic Notations - Divide and Conquer – Merge Sort - Greedy Algorithms – Knapsack Problem – Dynamic Programming – Warshall’s Algorithm for Finding Transitive Closure.					
UNIT V	ADVANCED ALGORITHM DESIGN AND ANALYSIS				12
Backtracking – N-Queen's Problem – Branch and Bound –Assignment Problem - P & NP problems – NP-complete problems – Approximation algorithms for NP-hard problems – Travelling salesman problem-Amortized Analysis.					
TOTAL :60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Demonstrate the operations of Linear and Non Linear Data Structures ❖ Construct Linear and Non Linear Data Structure based according to user needs ❖ Compare the various sorting and searching techniques ❖ Examine different algorithm design strategies ❖ Analyse and calculate the Efficiency of given algorithm. ❖ Apply the Algorithm design techniques to real world problems

20MC2L1	DATA STRUCTURES AND ALGORITHMS LABORATORY	L	T	P	C
		0	0	4	2
OBJECTIVES:					
<ul style="list-style-type: none"> • To develop skills in design and implementation of data structures and their applications • To learn and implement linear, non linear and tree data structures • To study, implement and analyze the sorting technique. • To implement some common algorithm design techniques. 					
LIST OF EXPERIMENTS:					
<ol style="list-style-type: none"> 1. Stack ADT implementation – Array implementation 2. Infix to postfix conversion 3. Queue ADT implementation – Linked list implementation 4. Singly Linked List operations 5. Binary Search tree implementation 6. Graph Traversals (Breadth First and Depth First search) 7. Spanning Tree Implementation (Prims/ Kruskals) 8. Merge Sort –Divide and Conquer 9. Find the Shortest Path using Dijkstra’s Algorithm – Greedy method 10. Warshall’s Algorithm for finding transitive closure using Dynamic programming 					
TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Demonstrate the various Linear Data Structures ❖ Demonstrate Tree Operations ❖ Demonstrate Graph Operations ❖ Implement the sorting and searching techniques ❖ Apply different algorithm design strategies to real world problems 					

20MC2L2	PYTHON PROGRAMMING LABORATORY	L	T	P	C
		0	0	4	2
OBJECTIVES:					
<ul style="list-style-type: none"> • To understand the basic functionalities techniques in python • To apply the various function techniques • To implement the Object-oriented Techniques • To create simple files and databases • To create Windows and Events oriented programming concepts 					
LIST OF EXPERIMENTS:					
<ol style="list-style-type: none"> 1. Basic Programs using Python. 2. Implement Linear and Binary Search 3. Implement Selection and Merge Sorts 4. Create Classes and Objects 5. Create Modules and Packages 6. Construct a linked list. Prompt the user for input. Remove any duplicate numbers from the linked list. 7. Read a file content and copy only the contents at even lines into a new file. 8. Create a table in SQLite / MySQL and apply SQL queries 9. Create GUI components using Tkinter 10. Create Mouse Events using Tkinter 					
TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Understand and Apply the concept of Basic Programs in python ❖ Apply any Object-Oriented Techniques ❖ Apply any compound data structures ❖ Create Files and Databases ❖ Design window-based applications ❖ Work effectively in a team through proper communication based on the given task and Prepare report on the observations of the experiments. 					

20MC2L3	WEB PROGRAMMING LABORATORY	L	T	P	C
		0	0	4	2
OBJECTIVES:					
<ul style="list-style-type: none"> • Try and develop the most important technologies that are being used today by web developers to build a wide variety of web applications. • To build web applications using proven developer tools and message formats. • To understand and practice web development techniques on client-side • Web applications using technologies such as HTML, CSS, Javascript, AJAX, JQuery and JSON. 					
LIST OF EXPERIMENTS:					
<ol style="list-style-type: none"> 1. Create your own Resume using HTML 5 Tags 2. Debug and validate your HTML document (Resume) using W3C validator and fix the issues. (https://validator.w3.org/#validate_by_upload). 3. Add Styles to your Resume using CSS 3 Properties. <ul style="list-style-type: none"> ➤ Add External, Internal and Inline CSS styles to know the priority. ➤ Add CSS3 Animation to your profile. 4. (a) Add functionalities that use any 2 of HTML 5 API's. (b). Create a student Registration form for Job Application and validate the form fields using JavaScript. 5. (a) Create a CGPA Calculator in Web Brower using HTML, CSS and JavaScript. Use functions in JavaScript. (b) Create a Quiz Program with adaptive questions using JavaScript. 6. Create a Pan Card Validation form using Object Oriented JavaScript, consider the 10th character to be an alphabet. <ul style="list-style-type: none"> ➤ Get the user's First Name, Last Name and other required fields as input ➤ Assume the last digit of the Pan Number to be an alphabet ➤ Validate the PAN Number 7. (a) Create an online Event Registration form and validate using JQuery (b) Create an online video Player which will allow you to play videos from the system and also create custom playlist using JQuery 8. Construct a JSON Structure for a bookstore and validate it using JSON Validator such as http://jsonlint.com/ and parse the Json file to list the books under the category "Fiction". Use Javascript or JQuery for parsing. 9. Using PHP and MySQL, develop a program to accept book information viz. Accession number, title, authors, edition and publisher from a web page and store the information in a database and to search for a book with the title specified by the user and to display the search results with proper headings. 10. Develop a Social Media Web Application using HTML5, CSS3, JQuery, AJAX & PHP. 					
TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Have a Good grounding of Web Application Terminologies, Internet Tools, and other web services. ❖ Develop simple web applications using scripting languages. ❖ Implement server side and client side programming develop web applications with various web technology concepts. ❖ Design a Web application using various technologies such as AJAX, JQuery and JSON. ❖ Develop an application for social media using HTML5, CSS3, JQuery, AJAX & PHP 					

20MC301	WEB APPLICATION DEVELOPMENT	L	T	P	C
		3	1	0	4
OBJECTIVES:					
<ul style="list-style-type: none"> To understand Enterprise Application Development and J2EE Technologies To understand Spring Framework and develop web applications using it. To get familiar with Struts Framework and develop web applications using it. To understand Hibernate Architecture and its working To be familiar with Django Framework. 					
UNIT I	J2EE				9+3
Introduction -Enterprise Architecture Styles -J2EE Architecture - Containers - J2EE Technologies - Developing J2EE Applications - Naming and directory services - Using JNDI - JNDI Service providers - Java and LDAP - LDAP operations - Searching an LDAP server - Storing and retrieving java objects in LDAP - Application Servers - Implementing the J2EE Specifications - J2EE packaging and Deployment - J2EE packaging overview - Configuring J2EE packages.					
UNIT II	SPRING				9+3
Spring Form Handling -Validating Form input- Accessing relational data using JDBC with spring- Uploading Files using spring application- Creation of Batch Service- Using Web Socket to build an interactive web application.					
UNIT III	STRUTS				9+3
Introduction to Struts – MVC framework- Struts Architecture – Business Service – Parameter Passing – Action class & configuration files – Struts.xml Tags – Namespace & Wildcards –Model Driven Action – Value stack & OGNL – Validation – Interceptors - Inbuilt Interceptors – Custom Interceptors .					
UNIT IV	HIBERNATE				9+3
HIBERNATE ORM-Persistence-Relational Database-The object relational impedance mismatch - Using Native Hibernate API's and hbm.xml- Using the java persistence API's -Hibernate Validator – HIBERNATE OGM – HIBERNATE SEARCH - Enabling full text search capabilities in entities - Indexing-Searching -Introduction to Full text search.					
UNIT V	DJANGO				9+3
Introduction to Django - Django model layer – View layer – Template Layer – Forms – Automated admin interface – Django Security – Internationalization and localization – Django Web application tools – Geographic Framework.					
L : 45, T : 15 TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Implement web applications using J2EE technologies for the given problem ❖ Compare the architecture of Spring, Struts Hibernate and Django Framework ❖ Use frameworks to Design applications according to customer needs ❖ Implement better Web apps more quickly and with less code using frameworks ❖ Examine the main features of Spring, Struts Hibernate and Django Framework ❖ Construct Internet systems for enhancing education and engineering design

20MC302	MOBILE COMPUTING	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> To learn the basic concepts, aware of the GSM, GPRS Architecture. To have an exposure about wireless protocols -WLAN, Bluetooth, WAP. To Know the Mobile IP Network Layer of Mobile communication To understand the concepts of Mobile Transport Layer To impart knowledge about Mobile Application Development 					
UNIT I	WIRELESS COMMUNICATION FUNDAMENTALS, ARCHITECTURE				9
Frequency Spectrum- Multiplexing- Spread spectrum-GSM vs CDMA - -Comparison of 2G 3 G, 4G - GSM Architecture-Entities-Call Routing- Address and identifiers- GSM Protocol architecture- Mobility Management-Frequency Allocation- Security –GPRS Architecture (entity and Protocol).					
UNIT II	MOBILE WIRELESS SHORT RANGE NETWORKS				9
Introduction-WLAN Equipment-WLAN Topologies-WLAN Technologies-IEEE 802.11 Architecture WLAN MAC-Security of WLAN Power Management-Standards- WAP Architecture- Bluetooth Architecture Bluetooth enabled Devices Network-Layers in Bluetooth Protocol-Security in Bluetooth- IrDA- ZigBee					
UNIT III	MOBILE IP NETWORK LAYER, TRANSPORT LAYER				9
IP and Mobile IP Network Layer- Packet delivery and Handover Management-Location Management- Registration- Tunneling and Encapsulation-Route Optimization- Mobile Transport Layer-Conventional TCP/IP Transport Layer Protocol-Indirect, Snooping, Mobile TCP.					
UNIT IV	MOBILE APPLICATION DEVELOPMENT USING ANDROID				9
Mobile Applications Development - Understanding the Android Software Stack – Android Application Architecture –The Android Application Life Cycle – The Activity Life Cycle- Creating Android Activity Views- Layout -Creating User Interfaces with basic views- linking activities with Intents.					
UNIT V	MOBILE APPLICATION DEVELOPMENT USING ANDROID				9
Services-Broadcast Receivers – Adapters – Data Storage, Retrieval and Sharing.-Location based services- Development of simple mobile applications					
TOTAL: 45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Illustrate the Wireless Communication Fundamentals and their Architectures ❖ Apply the WLAN Equipment, Topologies and their Technologies for short range Networks ❖ Examine the Bluetooth Architecture and their Protocols ❖ Use Packet Delivery and Handover Management in IP Network Layer ❖ Compare the different types of TCP ❖ Apply Mobile Application Development using Android

20MC303	CLOUD AND BIG DATA ANALYTICS	L	T	P	C
		3	1	0	4
OBJECTIVES:					
<ul style="list-style-type: none"> • To understand evolution of cloud computing, apply the concept of virtualization and its Security. • To explore the fundamental concepts of big data and analytics • To apply various techniques for mining data stream. • To understand the applications using Map Reduce Concepts • To understand the various search methods and visualization techniques 					
UNIT - I	CLOUD ARCHITECTURE AND VIRTUALIZATION	9+3			
Cloud Computing Overview: Characteristics – challenges, benefits, limitations, Evolution of Cloud Computing, Cloud computing architecture, Cloud Reference Model (NIST Architecture) - Cloud Services – Cloud models (IaaS, PaaS, SaaS) – Public Vs Private Cloud – Cloud ecosystem – Service management – Computing on demand – Virtualization- Cloud Security. Case Study: AWS, Google App Engine, Sales force.					
UNIT - II	INTRODUCTION TO BIG DATA	9+3			
Introduction to Big Data Platform – Characteristics of Big data – Challenges of Big Data Analytics - Need of big data frameworks- Analytic Processes and Tools - Analysis vs Reporting - Modern Data Analytic Tools - Statistical Concepts: Sampling Distributions - Re-Sampling - Statistical Inference - Prediction Error.					
UNIT - III	MINING DATA STREAMS	9+3			
Introduction To Streams Concepts – Stream Data Model and Architecture - Stream Computing - Sampling Data in a Stream – Filtering Streams – Counting Distinct Elements in a Stream – Estimating Moments – Counting Oneness in a Window – Decaying Window - Real time Analytics Platform(RTAP)Applications – Case Studies - Real Time Sentiment Analysis, Stock Market Predictions.					
UNIT - IV	FRAMEWORKS AND APPLICATIONS	9+3			
Framework – Hadoop- Setting up a Hadoop Cluster- Security in Hadoop- HDFS- Map Reduce -Hive – Sharding – NoSQL Databases –MongoDB– Analyzing big data with twitter – Big data for Ecommerce – Big data to improve medical innovation.					
UNIT - V	DATA ANALYSIS SYSTEMS AND VISUALIZATION	9+3			
Link Analysis – Page Rank - Efficient Computation of Page Rank- Topic-Sensitive Page Rank – Link Spam- Recommendation Systems- A Model for Recommendation Systems- Content Based Recommendations - Collaborative Filtering- Dimensionality Reduction- Visualizations - Visual data analysis techniques-interaction techniques- Systems and applications					
TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Identify the architecture, infrastructure, models and services of cloud computing, virtualization concept, security in cloud computing, apply suitable virtualization concept and analyze appropriate services for cloud environment. ❖ Understand big data platform, big data framework, data analysis tools, statistical concepts and analyze the various mining streams and apply for big data. ❖ Analyze the big data analytic techniques and apply for Real Time Sentiment Analysis, Stock Market Predictions. ❖ Analyze the HADOOP and Map Reduce technologies associated with big data analytics. 					

- ❖ Use a framework and explore the applications of big data analytics in social media applications and in other real time applications.
- ❖ Apply efficient algorithms for mining the data from large volumes and techniques for Visualization.

20MC304	SOFTWARE PROJECT MANAGEMENT	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> To know of how to do project planning for the software process. To learn the cost estimation techniques during the analysis of the project. To understand the quality concepts for ensuring the functionality of the software To Analyze Risk Identification and Resource Allocation To Identify Globalization issues in project management 					
UNIT - I	OVERVIEW OF SOFTWARE PROJECT MANAGEMENT	9			
Introduction to Software Project Management: An Overview of Project Planning: Select Project, Identifying Project scope and objectives, infrastructure, project products and Characteristics. Estimate efforts, Identify activity risks, and allocate resources, TQM, Six Sigma					
UNIT - II	EVALUATION AND COSTING OF SOFTWARE	9			
Project Evaluation: Strategic Assessment, Technical Assessment, cost-benefit analysis, Cash flow forecasting, cost-benefit evaluation techniques, Risk Evaluation. Selection of Appropriate Project approach: Choosing technologies, choice of process models, structured methods.					
UNIT - III	SOFTWARE ESTIMATION TECHNIQUES AND ACTIVITY PLAN	9			
Software Effort Estimation: Problems with over and under estimations, Basis of software Estimation, Software estimation techniques, expert Judgment, Estimating by analogy. Activity Planning: Project schedules, projects and activities, sequencing and scheduling Activities, networks planning models, formulating a network model.					
UNIT - IV	RISK MANAGEMENT AND RESOURCE ALLOCATION	9			
Risk Management: Nature of Risk, Managing Risk, Risk Identification and Analysis, Reducing the Risk. Resource Allocation: Scheduling resources, Critical Paths, Cost scheduling, Monitoring and Control: Creating Framework, cost monitoring, prioritizing monitoring.					
UNIT - V	CHALLENGES IN PROJECT MANAGEMENT	9			
Globalization issues in project management: Evolution of globalization- challenges in building global teams-models for the execution of some effective management techniques for managing global teams. Impact of the internet on project management: Introduction – the effect of internet on project management – managing projects for the internet – effect on project management activities..					
TOTAL : 45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Apply the activities during the project scheduling of any software application ❖ Analyze the risk management activities and the resource allocation for the projects ❖ Evaluate the software estimation and recent quality standards for evaluation of the software projects ❖ Assess the knowledge and skills needed for the construction of highly reliable software project ❖ Create reliable, replicable cost estimation that links to the requirements of project planning and managing ❖ Compare various Globalization issues in project management

20MC3L1	APPLICATION DEVELOPMENT LABORATORY	L	T	P	C
		0	0	4	2
OBJECTIVES:					
<ul style="list-style-type: none"> • To design applications using J2EE • To work with LDAP • To develop a simple application using Spring and Struts Framework 					
LIST OF EXPERIMENTS:					
<ol style="list-style-type: none"> 1. Develop a car showroom inventory web application with 2-tier architecture. Use JSP and JDBC. 2. Develop a real estate web application with n-tier architecture. Use JSP, Servlets and JDBC. 3. Develop web application which stores and authenticates user data using LDAP 4. Create an simple online bookstore using Spring MVC ,JDBC with CURD functionality 5. Design a student management web application using struts MVC, JDBC with CURD functionality. 6. Develop an application that uses GUI components, Font and Colors. 7. Write an application that draws basic graphical primitive on the screen. 8. Implement an application that implements Multi-threading 9. Develop a native calculator 10. Develop an application that uses GPS location information 					
TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Implement web applications using JSP, Servlet and JDBC ❖ Practice web application development using Spring and Struts Framework ❖ Demonstrate the use of LDAP 					

20MC3L2	CLOUD AND BIG DATA LABORATORY	L	T	P	C
		0	0	4	2
OBJECTIVES:					
<ul style="list-style-type: none"> • Be exposed to tool kits for cloud and Hadoop environment. • Be familiar with migration of Virtual Machines from one node to another • Learn to run virtual machines of different configuration. • Learn to use Hadoop Distributed File System (HDFS) to set up single and multi-node clusters. 					
LIST OF EXPERIMENTS:					
Use Eucalyptus or Open Nebula or Open Stack or equivalent to set up the cloud and demonstrate					
<ol style="list-style-type: none"> 1. Find procedure to run the virtual machine of different configuration. Check how many virtual machines can be utilized at particular time 2. Find procedure to attach virtual block to the virtual machine and check whether it holds the data even after the release of the virtual machine 3. Install a C compiler in the virtual machine and execute a sample program. 4. Install Google App engine. Create a hello world app and other web applications using Python/Java. 5. Show the virtual machine migration based on the certain condition from one node to the other 6. Find procedure to install storage controller and interact with it. 7. Find procedure to set up the one node Hadoop cluster. 8. Mount the one node Hadoop cluster using FUSE. 9. Write a word count program to demonstrate the use of Map - Reduce tasks. 10. K-means clustering using map reduce. 					
TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Use various virtualization tools such as Virtual box/VMware workstation. ❖ Apply C Compiler in Virtual Machine for various C Programs. ❖ Design and Implement applications on the Cloud environment. ❖ Set up and perform Hadoop cluster concept. ❖ Use the map reduce tasks and implement for various applications. ❖ Work effectively in a team through proper communication based on the given task and Prepare technical report on the observations of the experiments. 					

20MC2E1	WEB PROGRAMMING ESSENTIALS	L	T	P	C	
		3	0	0	3	
OBJECTIVES:						
<ul style="list-style-type: none"> To understand different Internet Technologies To practice markup languages To learn java specific web services architecture To understand and practice web development techniques on client side. 						
UNIT – I	INTRODUCTION TO WWW					9
Internet Standards – Introduction to WWW – WWW Architecture – SMTP – POP3 – File Transfer Protocol - Overview of HTTP, HTTP request – response — Generation of dynamic web pages.						
UNIT – II	HTML 5 & CSS3					9
HTML5 – Tables – Lists – Image – HTML5 control elements – Semantic elements – Drag and Drop – Audio – Video controls – CSS3 – Inline, embedded and external style sheets – Rule cascading – Inheritance – Backgrounds – Border Images –Margins & Padding - Colors – Shadows – Text – Transformations- Position using CSS – Transitions – Animations.						
UNIT - III	INTRODUCTION TO JAVA SCRIPT					9
Introduction - Core features - Data types and Variables - Operators, Expressions, and Statements - Functions - Objects - Array, Date and Math related Objects - Document Object Model - Event Handling - Controlling Windows & Frames and Documents - Form handling and validations.						
UNIT – IV	ADVANCED JAVA SCRIPT					9
Classes – Constructors – Object-Oriented Techniques in JavaScript – Object constructor and Prototyping - Sub classes and Super classes –JSON - JQuery and AJAX.						
UNIT – V	PHP					9
Introduction - Setting up the environment (LAMP server) - Programming basics Print/echo - Variables and constants – Strings and Arrays – Operators, Control structures and looping structures – Functions – Embedding PHP within HTML - Establishing connectivity with MySQL database.						
TOTAL: 45 PERIODS						
OUTCOMES:						
Upon Completion of the Course, the Students will be able to:						
<ul style="list-style-type: none"> ❖ Outline the basic concepts of information and web architecture. ❖ Understand the skills that will enable to design and build high level web applications. ❖ Study Hyper Text Markup language and create website using Html, CSS. ❖ Analyze the latest programming language for the implementation of object based and procedure based applications. ❖ Understand the applicability of Java Script. ❖ Implement PHP language to develop real world complex applications.

20MC2E2	PROFESSIONAL ETHICS	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> To understand the concepts of computer ethics and hacking. To understand the rights of Intellectual Property To understand the intricacies of accessibility issues To ensure safe exits when designing the software projects To understand the Social Networking ethical issues 					
UNIT - I	INTRODUCTION OF COMPUTER ETHICS AND HACKING				9
Introduction – Computer ethics: an overview – Identifying an ethical issue – Ethics and law – Ethical theories - Professional Code of conduct – A framework for ethical decision making - Computer hacking – Introduction – definition of hacking – Destructive programs – hacker ethics - Professional constraints – BCS code of conduct					
UNIT - II	INTELLECTUAL PROPERTY RIGHTS				9
Computer crime - Introduction - What is computer crime – computer security measures – Professional duties and obligations - Intellectual Property Rights – The nature of Intellectual property – Intellectual Property – Patents, Trademarks, Trade Secrets, Software Issues, Copyright - The extent and nature of software piracy – Ethical and professional issues					
UNIT - III	TECHNOLOGY AND SAFETY				9
Introduction – In defense of freedom expression – censorship – laws upholding free speech – Free speech and the Internet - Ethical and professional issues - Internet technologies and privacy – Safety and risk – assessment of safety and risk – risk benefit analysis – reducing risk.					
UNIT - IV	COMPUTER PROFESSIONAL ISSUES				9
Obstacles to access for individuals – professional responsibility - Empowering computers in the workplace – Introduction – computers and employment – computers and the quality of work – computerized monitoring in the work place – telecommuting – social, legal and professional issues - Use of Software, Computers and Internet-based Tools - Liability for Software errors - Documentation Authentication and Control – Software engineering code of ethics and practices, IEEE CS-ACM Joint task force					
UNIT - V	SOCIAL NETWORKING ETHICAL ISSUES				9
Strategies for engineering quality standards – Quality management standards – Social Networking – Company owned social network web site – the use of social networks in the hiring process – Social Networking ethical issues – Cyber bullying – cyber stalking – Online virtual world – Crime in virtual world - digital rights management					
					TOTAL : 45 PERIODS
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Apply ethical principles, values to tackle with various situations ❖ Analyze the effective usage of Computer as well as the technology ❖ Compute the impact on the products/ projects they develop in their career ❖ Prepare the coding ability of ethics and standards of computer professionals ❖ Assess the Professional responsibility and empowering access to information in the work place ❖ Rate the Ethical Issues in Social Networking 					

TEXT BOOKS:

1. Caroline Whitback, "Ethics in Engineering Practice and Research", Cambridge University Press, 2011.
2. George Reynolds, "Ethics in Information Technology", Cengage Learning, 2011.
3. John Weckert and Douglas Adeney, Computer and Information Ethics, Greenwood Press, 1997.
4. Penny Duquenoy, Simon Jones and Barry G Blundell, "Ethical, legal and professional issues in computing", Middlesex University Press, 2008.

20MC2E3	SECURITY IN COMPUTING	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> To understand the basics of cryptography learn to find the vulnerabilities in programs and to overcome them, know the different kinds of security threats in networks and its solution know the different kinds of security threats in databases and solutions available learn about the models and standards for security. 					
UNIT I	ELEMENTARY CRYPTOGRAPHY	9			
Terminology and Background – Substitution Ciphers – Transpositions – Making Good Encryption Algorithms- Data Encryption Standard- AES Encryption Algorithm – Public Key Encryption – Cryptographic Hash Functions Key Exchange – Digital Signatures					
UNIT II	PROGRAM SECURITY	9			
Secure programs – Non-malicious Program Errors – Viruses – Targeted Malicious code – Controls Against Program Threat – Control of Access to General Objects – User Authentication – Good Coding Practices - Most Dangerous Software Errors					
UNIT III	SECURITY IN NETWORKS	9			
Threats in networks – Virtual Private Networks – PKI – SSL – IPsec – Content Integrity – Access Controls – Honeypots – Traffic Flow Security – Firewalls – Intrusion Detection Systems – Secure e-mail.					
UNIT IV	SECURITY IN DATABASES	9			
Security requirements of database systems – Reliability and Integrity in databases –Redundancy – Recovery – Concurrency/ Consistency – Monitors – Sensitive Data – Types of disclosures – Inference-finding and confirming SQL injection					
UNIT V	SECURITY MODELS AND STANDARDS	9			
Secure SDLC – Security architecture models – Trusted Computing Base – Bell-La Padula Confidentiality Model – Biba Integrity Model – Graham-Denning Access Control Model – Harrison-Ruzzo-Ulman Model – Secure Frameworks – COSO – CobiT – Compliances – PCI DSS – Security Standards - ISO 27000 family of standards – NIST.					
TOTAL: 45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Apply cryptographic algorithms for encryption and decryption to reach secure data transmission ❖ Examine the program threats and apply good programming practice ❖ Analyze the various threats in Networks ❖ Apply the various Security Requirements of Database systems ❖ Use data vulnerability and sql injection in Database ❖ Construct the various security models and standards

20MC2E4	ACCOUNTING AND FINANCIAL MANAGEMENT	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> To understand the basic principles of Double entry system and preparation of balance sheet. To understand the process of estimating the cost of a particular product. To Prepare the estimate for various business activities such as purchase, sale, production and cash budgets To ensure decision making process of an organization. 					
UNIT – I	FINANCIAL ACCOUNTING	9			
Meaning and Scope of Accounting-Principles-Concepts-Conventions-Accounting Standards-Final Accounts-Trial Balance-Trading Account-Profit and Loss Account-Balance Sheet-Accounting Ratio Analysis-Funds Flow Analysis-Cash Flow Analysis					
UNIT – II	COST ACCOUNTING	9			
Meaning-Objectives-Elements of Cost-Cost Sheet-Marginal Costing and Cost Volume Profit Analysis- Break Even Analysis-Applications-Limitations-Standard Costing and Variance Analysis-Material- Labor-Overhead-Sales-Profit Variances					
UNIT – III	BUDGETS AND BUDGETING CONTROL	9			
Budgets and Budgetary Control-Meaning-Types-Sales Budget-Production Budget-Cost of Production Budget-Flexible Budgeting-Cash Budget-Master Budget-Zero Base Budgeting-Computerized Accounting					
UNIT – IV	INVESTMENT DECISION AND COST OF CAPITAL	9			
Objectives and Functions of Financial Management-Risk-Return Relationship-Time Value of Money Concepts-Capital Budgeting-Methods of Appraisal-Cost of Capital Factors Affecting Cost of Capital-Computation for Each Source of Finance and Weighted Average Cost of Capital.					
UNIT – V	FINANCING DECISION AND WORKING CAPITAL MANAGEMENT	9			
Capital Structure-Factors Affecting Capital Structure-Concepts of Working Capital-Working Capital Policies-Factors affecting Working Capital-Estimation of Working Capital Requirements					
TOTAL: 45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Able to understand balance sheet preparation and do analysis ❖ Able to understand budget preparation and control of a company ❖ Helps to decide about state of affairs of a particular firm or company ❖ Ensures the preparation of a fiscal policies of an organization ❖ Ensures the factors to be considered in investment policies 					
REFERENCES:

20MC2E5	HUMAN RESOURCE MANAGEMENT	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> • To understand the importance of human resources. • To describe the steps involved in the human resource planning process • To understand the stages of employee socialization and training needs. • To know about the purposes of performance management systems and appraisal. • To know the list of occupational safety and health administration enforcement priorities. 					
UNIT I	UNDERSTANDING HRM WITH LEGAL AND ETHICAL CONTEXT				9
Introduction- Importance of HRM – functions – Structure of HRM Department-Trends and opportunities – External Influences Affect HRM- HRM in global environment – The Changing World of Technology- HR & Corporate Ethics – Laws Affecting discriminatory practices – Enforcing Equal Opportunity Employment-Discipline & Employee Rights.					
UNIT II	STAFFING, RECRUITMENT AND SELECTION				9
Introduction – An Organizational Framework- Job analysis -Methods -Purpose– Recruiting Goals – Recruiting Sources – Recruiting A Global Perspective- Selection Process – Selection from Global Perspective- job offers – Avoiding hiring mistakes - key element for successful predictors.					
UNIT III	TRAINING AND DEVELOPMENT				9
Introduction – Socialization Process-Purpose of New employee orientation, Employee training- Employee Development– Organization development Calm Waters Metaphor – White-Water Rapids Metaphor – Evaluating training and Development Effectiveness- international training and development issues – Career Development -Value for organization and individual – mentoring and coaching – traditional career stages.					
UNIT IV	PERFORMANCE EVALUATION, REWARDS AND BENEFITS				9
Appraisal process – methods – factors distort appraisal – team appraisal – international appraisal – rewards –Theories of motivation - compensation administration – job evaluation and pay structure – special cases of compensation – executive compensation programs – employee benefits Voluntary Benefits- International Compensation.					
UNIT V	SAFE AND HEALTHY WORK ENVIRONMENT				9
Occupational safety and health act -Contemporary Health and Safety Issues –Employee assistance program – International Safety & Health -labor management - employee unions – labor legislation- Unionizing Employees- Collective Bargaining					
TOTAL: 45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Illustrate the primary external influences affecting HRM. ❖ Use the components and the goals of staffing, training and development. ❖ Sequence the Recruitment and selection procedure in various organizations. ❖ Apply Performance Evaluation Methods for Employees in an Organization ❖ Use the Rewards and Benefits of the Employee in the Organization. ❖ Examine the Issues involved in Safe and Health Work Environment

20MC2E6	RESOURCE MANAGEMENT TECHNIQUES	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> • To provide the concept and an understanding of basic concepts in Operations Research Techniques for Analysis and Modeling in Computer Applications. • To understand, develop and solve mathematical model of linear programming problems • To understand , develop and solve mathematical model of Transport and assignment problems • To Understand network modeling for planning and scheduling the project activities 					
UNIT I	LINEAR PROGRAMMING MODELS				9
Mathematical Formulation - Graphical Solution of linear programming models – Simplex method – Artificial variable Techniques.					
UNIT II	TRANSPORTATION AND ASSIGNMENT MODELS				9
Mathematical formulation of transportation problem- Methods for finding initial basic feasible solution – optimum solution - degeneracy –Mathematical formulation of assignment models – Hungarian Algorithm.					
UNIT III	INTEGER PROGRAMMING MODELS				9
Formulation – Gomory’s IPP method – Gomory’s mixed integer method – Branch and bound technique.					
UNIT IV	SCHEDULING BY PERT AND CPM				9
Network Construction – Critical Path Method – Project Evaluation and Review Technique – Resource Analysis in Network Scheduling					
UNIT V	QUEUEING MODELS				9
Characteristics of Queuing Models – Poisson Queues - (M / M / 1) : (FIFO / ∞ / ∞), (M / M / 1) : (FIFO / N / ∞), (M / M / C) : (FIFO / ∞ / ∞), (M / M / C) : (FIFO / N / ∞) models. TOTAL : 45 PERIODS					
TOTAL: 45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Understand and apply linear, integer programming to solve operational problem with constraint ❖ Apply transportation and assignment models to find optimal solution in warehousing and Travelling sales man problem ❖ To prepare project scheduling using PERT for given problem ❖ To prepare project scheduling using CPM for given problem ❖ Identify and analyze appropriate queuing model to reduce the waiting time in queue. ❖ Evaluate the optimization concepts in real world problems

20MC2E7	ARTIFICIAL INTELLIGENCE	L	T	P	C	
		3	0	0	3	
OBJECTIVES:						
<ul style="list-style-type: none"> To provide a strong foundation on fundamental concepts in Artificial Intelligence. To enable Problem-solving through various searching techniques. To apply these techniques in applications which involve perception, reasoning and learning. To apply Artificial Intelligence techniques for information retrieval To apply Artificial Intelligence techniques primarily for machine learning. 						
UNIT - I	INTRODUCTION					9
Introduction – Definition - Future of Artificial Intelligence – Characteristics of Intelligent Agents –Typical Intelligent Agents – Problem Solving Approach to Typical AI Problems.						
UNIT - II	PROBLEM SOLVING METHODS					9
Problem solving Methods - Search Strategies- Uninformed - Informed - Heuristics – Local Search Algorithms and Optimization Problems - Searching with Partial Observations -Constraint Satisfaction Problems – Constraint Propagation - Backtracking Search – Game Playing -Optimal Decisions in Games -Alpha--Beta Pruning -Stochastic Games.						
UNIT - III	KNOWLEDGE REPRESENTATION					9
First Order Predicate Logic – Prolog Programming - Unification -Forward Chaining –Backward Chaining - Resolution –Knowledge Representation - Ontological Engineering - Categories and Objects –Events - Mental Events and Mental Objects - Reasoning Systems for Categories-Reasoning with Default Information						
UNIT - IV	LEARNING					9
Probability basics - Bayes Rule and its Applications - Bayesian Networks – Exact and Approximate Inference in Bayesian Networks - Hidden Markov Models - Forms of Learning -Supervised Learning - Learning Decision Trees - Regression and Classification with Linear Models - Artificial Neural Networks - Nonparametric Models - Support Vector Machines -Statistical Learning - Learning with Complete Data - Learning with Hidden Variables- The EM Algorithm – Reinforcement Learning.						
UNIT - V	INTELLIGENCEANDAPPLICATIONS					9
Natural language processing-Morphological Analysis-Syntax analysis-Semantic Analysis-Ail applications – Language Models - Information Retrieval – Information Extraction - Machine Translation – Machine Learning - Symbol-Based – Machine Learning: Connectionist – Machine Learning.						
TOTAL: 45 PERIODS						
OUTCOMES:						
Upon Completion of the Course, the Students will be able to:						
<ul style="list-style-type: none"> ❖ Understand the basics and problem solving approach to AI problems. ❖ Analyze various search strategies for a problem. ❖ Use different knowledge representation schemes for typical AI problems. ❖ Design and implement a typical AI problem to be solved Using Machine Learning Techniques. ❖ Analyze the design of intelligent Artificial techniques. ❖ Apply the Intelligent techniques for problem solving.

20MC2E8	CRYPTOGRAPHY AND NETWORK SECURITY	L	T	P	C	
		3	0	0	3	
OBJECTIVES:						
<ul style="list-style-type: none"> To become skilled at fundamentals of secret and symmetric key cryptography To know and analyze about the public key cryptography system To be aware of the importance of information security To describe network security threats, network security tools and applications To describe system level security threats 						
UNIT - I	SYMMETRIC KEY CRYPTOGRAPHY					9
OSI security Architecture – Classical Encryption Techniques – Cipher Principles – Data Encrypted Standard – Blockcipher Design Principles and Modes of operation – Evaluation criteria for AES – AES Cipher – Triple DES – Placement of Encryption function – Traffic Confidentiality.						
UNIT - II	PUBLIC KEY CRYPTOGRAPHY					9
Introduction to Number Theory – Public Key Cryptography and RSA – Diffie-Hellman Key Exchange – Elliptic Curve Architecture and Cryptography Key management – Confidentiality using Asymmetric Encryption.						
UNIT - III	AUTHENTICATION AND HASH FUNCTION					9
Authentication requirements – Authentication Function – Message authentication Codes – Hash functions – Security of Hash function and MACs – MD5 message digest algorithm – Secure hash Algorithm – RIPEMD – HMAC Digital Signature – Authentication Protocols – Digital Signature Standard.						
UNIT - IV	NETWORK SECURITY					9
Authentication Applications: Kerberos – X.509 Authentication Service – Electronic Mail Security – PGP – S/MIME- IP Security – Web Security.						
UNIT - V	SYSTEM LEVEL SECURITY					9
Intrusion Detection – Password management – Viruses and related threats – Virus counter measures – Firewall Design Principles – Trusted Systems.						
TOTAL : 45 PERIODS						
OUTCOMES:						
Upon Completion of the Course, the Students will be able to:						
<ul style="list-style-type: none"> ❖ Apply symmetric and asymmetric ciphers to encrypt data. ❖ Apply public key cryptography algorithms for encryption. ❖ Examine digest for the purpose of authentication. ❖ Apply hash function concepts. ❖ Analyze the common network vulnerabilities and their defense mechanism. ❖ Analyze the anti-threat mechanism for security. 						
TEXT BOOKS:						
1. William Stallings, “Cryptography and Network Security – Principle and Practices”, 7 th Edition, Pearson Education, 2016.						
2. Behrouz A. Forouzan, “Cryptography and Network Security”, Tata McGraw-Hill, 2007.

3. Charles P. P fleeger and Shari Lawrence P fleeger, “Security in computing”, 4 th Edition, Prentice Hall, 2006.						

20MC3E1	SOFTWARE TESTING AND QUALITY ASSURANCE	L	T	P	C	
		3	0	0	3	
OBJECTIVES:						
<ul style="list-style-type: none"> • To know the behavior of the testing techniques and to design test cases to detect the errors in the software • To be familiar with test management and test automation techniques. • To be exposed to test metrics and measurements. • To learn the functionality of automated testing tools to apply in the specialized environment. • To understand the models and metrics of software quality and reliability. 						
UNIT – I	INTRODUCTION					9
Testing as an Engineering Activity – Testing as a Process – Testing Maturity Model- Testing axioms – Basic definitions – Software Testing Principles – The Tester’s Role in a Software Development Organization – Origins of Defects – Cost of defects – Defect Classes – The Defect Repository and Test Design –Defect Examples- Developer/Tester Support of Developing a Defect Repository.						
UNIT – II	TESTING TECHNIQUES AND TEST CASE DESIGN					9
Using White Box Approach to Test design - Test Adequacy Criteria – Static Testing Vs. Structural Testing – Code Functional Testing – Coverage and Control Flow Graphs – Covering Code Logic – Paths – Their Role in White box Based Test Design – Code Complexity Testing – Evaluating Test Adequacy Criteria. Test Case Design Strategies – Using Black Box Approach to Test Case Design – Random Testing – Requirements based testing – Boundary Value Analysis –Decision tables – Equivalence Class Partitioning – State based testing – Cause-effect graphing – Error guessing – Compatibility testing – User documentation testing – Domain testing – Case study for Control Flow Graph and State based Testing.						
UNIT – III	LEVELS OF TESTING					9
The need for Levels of Testing – Unit Test – Unit Test Planning – Designing the Unit Tests – The Test Harness – Running the Unit tests and Recording results – Integration tests – Designing Integration Tests – Integration Test Planning – Scenario testing – Defect bash elimination System Testing – Acceptance testing – Performance testing – Regression Testing – Internationalization testing – Ad-hoc testing – Alpha, Beta Tests – Testing OO systems – Usability and Accessibility testing – Configuration testing –Compatibility testing – Testing the documentation – Website testing.						
UNIT – IV	TEST AUTOMATION					9
Selecting and Installing Software Testing Tools - Software Test Automation – Skills needed for Automation – Scope of Automation – Design and Architecture for Automation – Requirements for a Test Tool – Challenges in Automation – Tracking the Bug – Debugging – Case study using Bug Tracking Tool.						
UNIT – V	QUALITY METRICS					9
Six-Sigma – TQM - Complexity Metrics and Models – Quality Management Metrics - Availability Metrics - Defect Removal Effectiveness - FMEA - Quality Function Deployment – Taguchi Quality Loss Function – Cost of Quality. Case Study for Complexity and Object Oriented Metrics.						
TOTAL: 45 PERIODS						

OUTCOMES:**Upon Completion of the Course, the Students will be able to:**

- ❖ Design test cases suitable for a software development for different domains.
- ❖ Analyze the suitable test cases to be carried out.
- ❖ Prepare test planning based on document.
- ❖ Evaluate the web applications using bug tracking tools.
- ❖ Create test strategies and plans, design test cases, prioritize and execute them.
- ❖ Apply quality and reliability metrics to ensure the performance of the software and Able to develop and validate a test plan.

20MC3E2	DATA MINING AND DATA SCIENCE	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> To Understand Data mining principles and techniques and Introduce DM as a cutting edge business intelligence To learn to use association rule mining for handling large data To understand the concept of classification for the retrieval purposes To understand the concepts of machine learning To learn various applications of Data Science 					
UNIT - I	DATA MINING & DATA PREPROCESSING				9
Introduction to KDD process – Knowledge Discovery from Databases - Need for Data Preprocessing – Data Cleaning – Data Integration and Transformation – Data Reduction – Data Discretization and Concept Hierarchy Generation					
UNIT - II	ASSOCIATION RULE MINING				9
Introduction - Data Mining Functionalities - Association Rule Mining - Mining Frequent Item sets with and without Candidate Generation - Mining Various Kinds of Association Rules - Constraint-Based Association Mining					
UNIT - III	CLASSIFICATION & PREDICTION				9
Classification vs. Prediction – Data preparation for Classification and Prediction – Classification by Decision Tree Introduction – Bayesian Classification – Rule Based Classification – Classification by Back Propagation – Support Vector Machines – Associative Classification – Lazy Learners – Other Classification Methods – Prediction – Accuracy and Error Measures					
UNIT - IV	FUNDAMENTALS OF DATA SCIENCE				9
Introduction to Data Science - Overview of the Data Science process -Introduction to Data science technologies -Introduction to Machine Learning – Regressions –Classification-Clustering					
UNIT - V	APPLICATIONS OF DATA SCIENCE				9
Applications of Data Science, Recent trends in various data collection and analysis techniques, various visualization techniques, application development methods used in data science.					
TOTAL : 45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Apply data mining tools and techniques in building intelligent machines ❖ Analyze various data mining algorithms in applying in real time ❖ Demonstrate the data mining algorithms to combinatorial optimization problems ❖ Evaluate mining techniques like association, classification and clustering on transactional databases. ❖ Apply various Machine learning Algorithms to different applications ❖ Outline various clustering methods and Analyze

20MC3E3	MACHINE LEARNING	L	T	P	C
		3	1	0	4
OBJECTIVES:					
<ul style="list-style-type: none"> To understand the concepts of Machine Learning. To appreciate supervised learning and their applications. To appreciate the concepts and algorithms of unsupervised learning. To understand the theoretical and practical aspects of Probabilistic Graphical Models. To study applications of machine learning in real world domains 					
UNIT - I	INTRODUCTION				9+3
Machine Learning–Types of Machine Learning –Machine Learning process- preliminaries, testing Machine Learning algorithms, turning data into Probabilities, and Statistics for Machine Learning Probability theory – Probability Distributions – Decision Theory - The Bias-Variance Tradeoff.					
UNIT - II	SUPERVISED LEARNING				9+3
Linear Models for Regression – Linear Models for Classification- Discriminant Functions, Probabilistic Generative Models, Probabilistic Discriminative Models – Decision Tree Learning – Bayesian Learning, Naïve Bayes – Ensemble Methods, Bagging, Boosting, Neural Networks, Multi-layer Perceptron, Feed- forward Network, Error Back propagation - Support Vector Machines.					
UNIT - III	UNSUPERVISED LEARNING				9+3
Clustering- K-means – EM Algorithm- clustering around medoids - clustering using kernels - silhouettes - hierarchical clustering - Document clustering - Mixtures of Gaussians –Dimensionality Reduction, Linear Discriminant Analysis, Factor Analysis, Principal Components Analysis, Independent Components Analysis.					
UNIT - IV	PROBABILISTIC GRAPHICAL MODELS				9+3
Graphical Models – Undirected Graphical Models – Markov Random Fields – Directed Graphical Models –Bayesian Networks – Conditional Independence properties – Markov Random Fields Hidden Markov Models – Conditional Random Fields(CRFs).					
UNIT - V	APPLICATIONS				9+3
Object Recognition-Customer Segmentation- Credit Card Fraud Detection- Sentiment Analysis-Diabetes Diagnosis System.					
TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Apply the Supervised learning methods to solve a problem and identify the accuracy value. ❖ Implement a Neural Network for an application and analyze the results. ❖ Use Clustering algorithms for different types of applications. ❖ Examine the appropriate graph models of machine learning. ❖ Select a suitable machine learning algorithms for solving real world problems. ❖ Apply the knowledge of machine learning to explore new applications.

20MC3E4	ADVANCED DATABASES	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> To explore the features of Parallel and Distributed databases To learn the concepts of Object Oriented Databases To provide knowledge about XML Databases To know about Temporal and Spatial Databases To explore different multimedia data structures and multimedia databases like image, text, audio and video 					
UNIT - I	PARALLEL AND DISTRIBUTED DATABASES	9			
Database System Architectures: Centralized and Client-Server Architectures– Server System Architectures –Parallel Databases: I/O Parallelism – Interquery Parallelism –Intraquery Parallelism – Distributed Databases: - Homogeneous and Heterogeneous Databases - Distributed Data Storage – Distributed Transactions – Concurrency Control in Distributed Databases – Distributed Query Processing.					
UNIT - II	OBJECT AND OBJECT RELATIONAL DATABASES	9			
Object-Based Databases: Complex Data Types– Structured Types and Inheritance in SQL – Table Inheritance – Array and Multiset Types in SQL – Object Identity and Reference Types in SQL – Implementing O-R Features – Persistent Programming Languages – Object-Oriented versus Object – Relational.					
UNIT - III	XML DATABASES	9			
XML: Motivation – Structure of XML Data – XML Document Schema – Querying and Transformation – Application Program Interfaces to XML –Storage of XML Data – XML Applications.					
UNIT - IV	SPATIAL AND TEMPORAL DATABASES	9			
Spatial and Temporal Data and Mobility: Time in Databases – Spatial and Geographic Data Mobility and Personal Databases.					
UNIT – V	MULTIMEDIA DATABASES	9			
Multidimensional Data Structures: k-d Trees – Point Quadrees – MXQuadtree – R-Tree - Image Databases: Representing Image DBs with Relations – Representing Image DBs with R-Trees – Text/Document Databases: TV Trees - Video Databases – Audio Databases.					
TOTAL: 45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Understand Parallel Databases and Distributed Databases ❖ Understand Object Oriented Databases ❖ Explore XML Databases ❖ Understand Temporal and Spatial Databases ❖ Analyze multimedia data structures and multimedia databases 					
TEXT BOOK:

20MC3E5	SERVICE ORIENTED ARCHITECTURE	L	T	P	C	
		3	0	0	3	
OBJECTIVES:						
<ul style="list-style-type: none"> To provide fundamental concepts of xml and web services To understand Service Oriented Architecture and its principles. To gain knowledge about WS standards To be familiar with building application based on SOA To learn SOA support in .NET and J2EE 						
UNIT I	XML AND WEBSERVICES					9
Introduction- XML document structure – Well formed and valid documents – Namespaces – DTD – XML Schema – Parsing XML – using DOM, SAX – XML Transformation and XSL – XSL Formatting – Web service architecture – Overview						
UNIT II	SOA BASICS					9
Characteristics of SOA, Comparing SOA with Client-Server and Distributed architectures – Benefits of SOA — Principles of Service orientation – Service layers.						
UNIT III	WEB SERVICE STANDARDS					9
Descriptions – WSDL – Messaging with SOAP – Service discovery – UDDI – Service-Level Interaction Patterns – Orchestration and Choreography						
UNIT IV	BUILDING SOA-BASED APPLICATIONS					9
Service Oriented Analysis and Design – Service Modeling – Design standards and guidelines — Composition – WS-BPEL – WS-Coordination – WS-Policy – WS-Security						
UNIT V	SOA SUPPORT IN .NET AND J2EE					9
SOA platform basics – SOA support in J2EE – Java API for XML-based web services (JAX-WS) - Java architecture for XML binding (JAXB) – Java API for XML Registries (JAXR) - Java API for XML based RPC (JAX-RPC)- Web Services Interoperability Technologies (WSIT) – SOA support in .NET – Common Language Runtime - ASP.NET web services-Web Service Enhancement(WSE)- Create web service in .NET						
TOTAL:45 PERIODS						
OUTCOMES:						
Upon Completion of the Course, the Students will be able to:						
<ul style="list-style-type: none"> ❖ Illustrate the need of various XML Technologies in SOA ❖ Demonstrate the Serviced Oriented Architecture and the composition of Web Service in it ❖ Illustrate how the various Web Service Standards are related to each other in SOA ❖ Compare SOA support in .NET and J2EE ❖ Construct web services according to user needs using J2EE and .NET

20MC3E6	INTERNET OF THINGS	L	T	P	C
		3	1	0	4
OBJECTIVES:					
<ul style="list-style-type: none"> To understand the fundamentals of Internet of Things. To get an exposure on architecture of IoT. To learn about the basics of IOT protocols and its security. To build a small low cost embedded system using Raspberry Pi. To apply the concept of Internet of Things in the real world scenario. 					
UNIT - I	INTRODUCTION TO IoT				9+3
Overview and Introduction, Internet of Things (IoT), Web of Things (WoT), Cloud of Things, Need for IoT on Cloud, Services in the Cloud for the Internet of Things, Applications of IoT- Physical Design- Logical Design- IoT Enabling Technologies - IoT Levels & Deployment Templates - Domain Specific IoTs-IoT and M2M-IoT System Management with NETCONF-YANG-IoT Platforms Design Methodology.					
UNIT - II	IoT ARCHITECTURE				9+3
M2M high-level ETSI architecture - IETF architecture for IoT - OGC architecture - IoT reference model - Domain model - information model - functional model - communication model - IoT reference architecture.					
UNIT - III	IoT PROTOCOLS				9+3
Protocol Standardization for IoT – Efforts – M2M and WSN Protocols – SCADA and RFID Protocols – Unified Data Standards – Protocols – IEEE 802.15.4 – BACNet Protocol – Modbus– Zigbee Architecture – Network layer – 6LowPAN – CoAP – Security.					
UNIT - IV	BUILDING IoT WITH RASPBERRY PI & ARDUINO				9+3
Building IOT with RASPBERRY PI- IoT Systems - Logical Design using Python – IoT Physical Devices & Endpoints - IoT Device -Building blocks -Raspberry Pi -Board - Linux on Raspberry Pi - Raspberry Pi Interfaces -Programming Raspberry Pi with Python - Other IoT Platforms - Arduino.					
UNIT - V	CASE STUDIES AND REAL-WORLD APPLICATIONS				9+3
Real world design constraints - Applications - Asset management, Industrial automation, smart grid, Commercial building automation, Smart cities - participatory sensing - Data Analytics for IoT – Software & Management Tools for IoT Cloud Storage Models & Communication APIs - Cloud for IoT - Amazon Web Services for IoT.					
TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Understand the architectures, models and various protocols for IoT. ❖ Apply Arduino / Raspberry Pi to develop simple applications. ❖ Examine web services to access/control IoT devices. ❖ Analyze data analytics techniques to IoT for real time applications. ❖ Deploy an IoT application and use cloud offerings related to IoT. ❖ Create appropriate solutions for industrial applications.

20MC3E7	OBJECT ORIENTED ANALYSIS AND DESIGN	L	T	P	C
		3	1	0	4
OBJECTIVES:					
<ul style="list-style-type: none"> To understand the basics of object modeling techniques To design with static and Dynamic UML diagrams. To enhance knowledge on Axioms and Corollaries To implement the software design with design patterns. To gain knowledge about open source tools for Computer Aided Software Engineering 					
UNIT - I	INTRODUCTION				9+3
An overview – Object basics – Object state and properties – Behavior – Methods – Messages – Information hiding – Class hierarchy – Relationships –Associations –Attributes—Aggregations and Compositions-Generalizations and Specializations – Dynamic binding – Persistence – Meta classes – Object oriented system development lifecycle.					
UNIT - II	MODELS AND UML DIAGRAMS				9+3
Introduction – Survey – Rumbugh, Booch, Jacobson methods — Unified approach – Unified modeling language – Static and Dynamic models – UML diagrams – Class diagram-Finding conceptual classes and description classes – Use case diagrams – Use case Modeling – Relating Use cases – include, extend and generalization					
UNIT - III	DYNAMIC AND IMPLEMENTATION UML DIAGRAMS				9+3
UML interaction diagrams - System sequence diagram – Collaboration diagram –State machine diagram and Modeling – Activity diagram – Implementation Diagrams- UML package diagram – Component and Deployment Diagrams – Design of online railway reservation system using UML diagrams - Dynamic Modeling – Model organization					
UNIT - IV	DESIGN PATTERNS				9+3
Design process and benchmarking – Axioms – Corollaries – Patterns – Frameworks-Designing classes – Class visibility – Refining attributes – Methods and protocols —Object storage and object interoperability – Databases – Object relational systems – Designing interface objects – Macro and Micro level processes-The purpose of a view layer interface-OOUI - MVC Architectural Pattern and Design - Designing the system.					
UNIT - V	CASE TOOLS				9+3
Railway domain: Platform assignment system for the trains in a railway station - Academic domain : Student Marks Analyzing System - ATM system - Stock maintenance - Quiz System - Health Care Systems. Use Open source CASE Tools: Star UML/ UML Graph for the above case studies.					
TOTAL: 60 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Understand the object oriented concepts and to apply object oriented life cycle model for a project. ❖ Identify and refine the attributes and methods to develop the object oriented system for the given problem. ❖ Examine the static models and apply UML diagram for real time domain. ❖ Analyze dynamic models for a given scenario and draw the model using UML diagrams. ❖ Use design pattern techniques to design a model for the given system. ❖ Design a UML diagram for the given scenario using open source CASE tools.

20MC3E8	XML AND WEB SERVICES	L	T	P	C
		3	0	0	3
OBJECTIVES:					
<ul style="list-style-type: none"> To understand the advantages of using XML technology family To analyze the problems associated with tightly coupled distributed software architecture To learn the Web services building block To implement e-business solutions using XML based web services 					
UNIT I	XML TECHNOLOGY FAMILY	9			
Introduction - XML – benefits – Advantages of XML over HTML, EDI, Databases – XML based standards – Structuring with schemas - DTD – XML Schemas – XML processing – DOM –SAX – presentation Technologies – XSL – XFORMS – XHTML – Transformation – XSLT – XLINK – XPATH – XQuery					
UNIT II	ARCHITECTING WEB SERVICES	9			
Business motivations for web services – B2B – B2C – Technical motivations – limitations of CORBA and DCOM – Service-oriented Architecture (SOA) – Architecting web services – Implementation view – web services technology stack – logical view – composition of web services – deployment view – from application server to peer to peer – process view – life in the runtime					
UNIT III	WEB SERVICES BUILDING BLOCKS	9			
Transport protocols for web services – messaging with web services - protocols - SOAP - describing web services – WSDL – Anatomy of WSDL – manipulating WSDL – web service policy – Discovering web services – UDDI – Anatomy of UDDI – Web service inspection – Ad-Hoc Discovery - Securing web services					
UNIT IV	IMPLEMENTING XML IN E-BUSINESS	9			
B2B – B2C Applications – Different types of B2B interaction – Components of e-business XML systems – eb XML – Rosetta Net - Applied XML in vertical industry – web services for mobile devices					
UNIT V	XML CONTENT MANAGEMENT AND SECURITY	9			
Semantic Web – Role of Meta data in web content - Resource Description Framework – RDF schema – Architecture of semantic web – content management workflow – XLANG – WSFL – Securing web services					
TOTAL :45 PERIODS					
OUTCOMES:					
Upon Completion of the Course, the Students will be able to:					
<ul style="list-style-type: none"> ❖ Interpret the role of various XML technologies in web applications ❖ Analyze the problems associated with tightly coupled distributed software architecture ❖ Illustrate how web service architecture and how the various Web Service Standards are related to each other ❖ Implement e-business solutions using XML based web services ❖ Illustrate Semantic Web architecture ,content management and security

20NEAC01	ENGLISH FOR RESEARCH PAPER WRITING	L	T	P	C
		2	0	0	0
OBJECTIVES:					
This course is intended to provide an integrated framework for the students can able to: <ul style="list-style-type: none"> • Understand that how to improve your writing skills and level of readability • Learn about what to write in each section • Understand the skills needed when writing a Title • Ensure the good quality of paper at very first-time submission 					
UNIT I					4
Planning and Preparation, Word Order, Breaking up long sentences, Structuring Paragraphs and Sentences, Being Concise and Removing Redundancy, Avoiding Ambiguity and Vagueness.					
UNIT II					4
Clarifying Who Did What, Highlighting Your Findings, Hedging and Criticising, Paraphrasing and Plagiarism, Sections of a Paper, Abstracts and Introduction.					
UNIT III					4
Review of the Literature, Methods, Results, Discussion, Conclusions, The Final Check.					
UNIT IV					4
Key skills are needed when writing a Title, Key skills are needed when writing an Abstract, Key skills are needed when writing an Introduction, Skills needed when writing a Review of the Literature.					
UNIT V					4
Skills are needed when writing the Methods, Skills needed when writing the Results, Skills are needed when writing the Discussion, Skills are needed when writing the Conclusions.					
UNIT VI					4
Useful phrases, How to ensure paper is as good as it could possibly be the first-time submission.					
TOTAL: 24 PERIODS					
REFERENCES:

20NEAC02	DISASTER MANAGEMENT	L	T	P	C
		2	0	0	0
OBJECTIVES:					
This course is intended to provide an integrated framework for the students can able to: <ul style="list-style-type: none"> Learn to demonstrate a critical understanding of key concepts in disaster risk reduction and humanitarian response. Critically evaluate disaster risk reduction and humanitarian response policy and practice from multiple perspectives. Develop an understanding of standards of humanitarian response and practical relevance in specific types of disasters and conflict situations. Critically understand the strengths and weaknesses of disaster management approaches, planning and programming in different countries, particularly their home country or the countries they work in. 					
UNIT I					4
Disaster: Definition, Factors and Significance, Difference between Hazard and Disaster. Natural and Manmade Disasters: Difference, Nature, Types and Magnitude.					
UNIT II					4
Repercussions of Disasters and Hazards: Economic Damage, Loss of Human and Animal Life, Destruction Of Ecosystem.
